

Hi Friends,

Operator Training in Wright City, Warrensburg, MO

As you may know, H2O'C Engineering offers operator training at locations in Missouri and Illinois several times each year. We currently have upcoming MWWC-sponsored programs on July 29 in Wright City and August 7 in Warrensburg. Topics will include treatment, distribution, and security. (MDNR course #'s: 0306408 & 0301409; credit hours: 6.0 water, 6.0 distribution, 2.0 wastewater.) More info resides at:

www.mwwc.info/Training/wrightcity.pdf

Water Surfing for Fun and Profit

For those of you who are web surfers and seekers of serious information on water-related subjects, we recommend a visit to the Water Librarians' Home Page. A wide range of useful material on water and wastewater is available at this well-developed site.

www.interleaves.org/~rteeter/waterlib.html

For those of you who are deeply concerned about all weapons of mass destruction, including the indisputable danger presented by dihydrogen monoxide, a personal link to the following home page is indispensable.

www.dhmo.org/

Finally, the H2O'C Engineering website, www.h2oc.com is attracting 60 visitors per day, most of whom are probably lost. Even so, we continue to offer new technical papers at this site. Our most recent posting, entitled 'Pit Happens', relates the results of our study of copper pitting in household plumbing. If you are interested in pits in pipe, the illustrations alone are worth a look.

Need Technical Help or Gratuitous Advice?

If you have an interesting water or wastewater project or problem, or even if it is fairly dull and routine, we trust you will give H2O'C Engineering a chance to work with you to find an economic, and possibly even interesting, solution. We can be reached at 877-22-WATER (877-229-2837) or by replying to this e-mail address.
